

New FlowAnalyser™ Adapter Set

FlowAnalyser™ Adapter Set

imtmedical is now introducing the new FlowAnalyser Adapter Set. In 2007, the FlowAnalyser Adapter Set will be included, free of charge, with every FlowAnalyser purchase. If you have already purchased your FlowAnalyser, the Adapter Set can be purchased separately.

The Adapters included assist in connecting various test objects to the FlowAnalyser. All respiratory and anaesthesia machine tubing systems connect easily to the FlowAnalyser using these Adapters. A minimal amount of dead space as well as minimal differences in Flow stream assist in assuring highly accurate measurements.

FlowAnalyser Adapter Set Details:

- High Pressure DISS O₂ Adapter included in the Adapter Set
- All FlowAnalyser Purchases in 2007 automatically include the Adapter Set
- FlowAnalyser Adapter Set can also be purchased separately
- FlowAnalyser Adapter Set can easily be packed in the top right pocket inside your FlowAnalyser Transport Case
- Sales price: 76 EUR / 97 USD / 113 CHF
- Purchase Order Nr.: 300.548.000

New Team Members

Philipp John has a strong technical background and a degree in Biomedical Engineering. He joins imtmedical from Scanco Medical where he managed the service and support team for key accounts in the USA. Philipp John strengthens our Sales Force and his areas of Sales responsibility include the UK, Ireland, Spain, Italy, South East Asia and China. Please join us in welcoming Philipp to the imtmedical team!

imtmedical @ ARAB Health 07'

Arab Health 2007

Billed as the largest event of its kind for the Middle East region, Arab Health 2007 closed its doors on February 1st having successfully entertained over 2,200 exhibiting companies from 70 countries internationally. There has been unprecedented growth in exhibition space since 2001 with a steady increase of 25 percent per year.

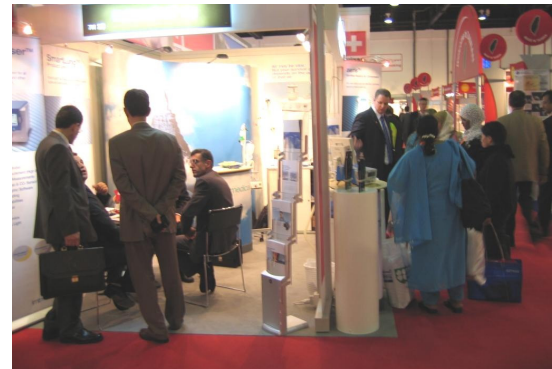

imtmedical exhibited for the first time at Arab Health 2007. Our booth was located in the Swiss Pavillion (Hall 7).

Many ventilator manufacturers such as Dräger, Hamilton Medical & Spacelabs Healthcare find the imtmedical SmartLung useful for demonstration purposes during exhibitions.

We were able to meet many of our customers from the Middle East, Asia and Europe. If we saw you at Arab Health, thank you for stopping by. If we missed each other, we hope to see you in the near future!

Liechtenstein Phone & Fax Number Disconnected

Our Liechtenstein phone and fax number (from 2005) have been disconnected. Unfortunately, all faxes sent to our old Liechtenstein number will not be forwarded or received by our office in Switzerland. Please note our new contact information. We apologize for any inconvenience.
